Randal, Stephen Patent Application 2004/0024846 OCT 04 2004  
 Ryan, Kevin Patent Application 2003/0152207

I recently received your claims rejection on the above Patent Applications and would like to discuss some questions & comments. Please call me (Kevin Ryan) at 610-965-0835.

Question 1 - my application is filed before the Randal Application. Does this help me?

Comment 2 - Although Both Applications Address Call Screening, I feel that they accomplish this in different concepts.

In my application the caller would have software in his browser that would read information from a website ~~to screen~~ (the website of the receiver of the call) and this information would be used to determine which functions in his own browser would be activated.

In the Randal Application the caller is limited access by screening at the server not by software that resides in his own computer.

My application uses a home webpages as the conduit for receivers of calls to provide information to the callers browser.

The Randal application requires the server to store & screen calls.

Thanks Kevin Ryan kryan@ptd.net 610-965-0835
